## Product information

## Brief introduction

Standard flush diaphragm

Standard extended diaphragm

KC-8000D-FD flange direct mounting pressure transmitter is a high performance pressure transmitter with international leading technology meticulously designed by Golden Rules, using the world's most advanced monosilicon pressure sensor technology and patent encapsulation technology. Monosilicon pressure sensor locates on the top of the metal body and stay away from the medium interface to realizes mechanical isolation and thermal isolation. Glass sintering sensor wire realizes high strength electrical insulation of metal base and improves the capability of flexibility of electronic circuit and transient voltage resistance protection. All these original encapsulation technologies enable KC-8000-FD to easily cope with extreme chemical occasion and mechanical load, and own strong resistance to EMI, sufficient to respond to the most rigorous industrial environment applications, which are the genuine invisible instruments.
